

The complete range of
ID card printers, all with
security built in.

Secure ID card printing for every budget, industry and application

Cards have become a part of everyday life. Used for gaining access to buildings and facilities, verifying that individuals are who they say they are or simply being used to purchase goods or services, cards have become the ubiquitous global standard for identity.

Discover how secure ID cards, printed and programmed with Magicard products, can be used across multiple applications in your industry sector to improve efficiency and productivity and most importantly, to protect and secure your organisation.

Security features

SECURITY
LEVEL

HoloKote®

We're all about security. That's why we developed the HoloKote® watermark available for all of our printers direct-to-card and retransfer printers (NB PCP?)

HoloKote® technology was pioneered by Magocard to apply a secure watermark to each card during the printing process. This feature exploits the wavelengths and lens effect of the film to fluoresce under UV lighting conditions.

Custom HoloKote®

This feature, available on some of our models, facilitates the implementation of a personalised HoloKote® watermark into the standard print process. This watermark could be an organisation's logo, or some other unique security design.

HoloPatch®

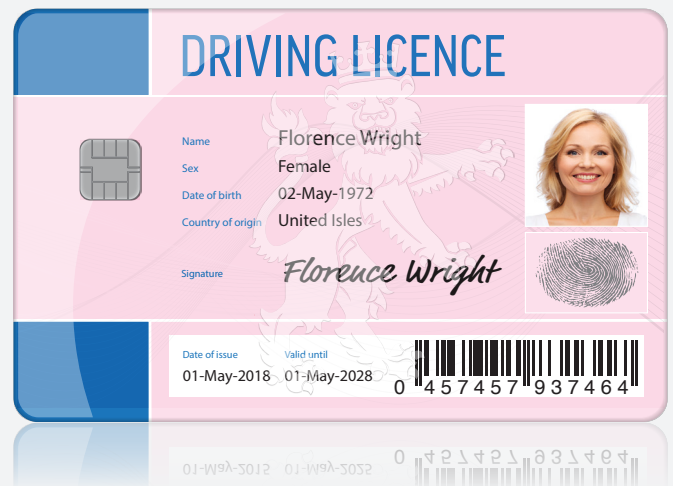

Unique to Magocard, HoloPatch® cards have a highly reflective gold 'super diffuser' seal. When the HoloKote® watermark is printed on to the seal, the watermark becomes clearly visible under all lighting conditions. HoloKote® with HoloPatch® has a similar appearance to hologram seals. It provides a security mark which is visible from a distance, allowing a security guard or colleague to easily verify badge authenticity.

Specialist security

Our latest printer, the Magocard 600 offers additional security features:

Digital Shredding - once data has been used for the print job, it is fragmented, rendering it irrecoverable, helping to ensure the Magocard 600 is not a repository for data.

Threat benchmarked - we run security scans against the National Vulnerabilities Database and push regular updates to the device, ensuring that the printer software and associated system configuration conform to the highest levels of security.

Industry applications

- State drivers licence

- Localised national ID card issuance

- Fully personalised financial card

Photo-quality over-the-edge retransfer printing

Powered by a high-grade processing unit with an impressive array of features, the Magicard Ultima is ideal for the localised or centralised issue of high-volumes of secure smart cards.

Ultima enables you to print up to 100 high definition full colour cards per hour. The quality of print means staff can quickly and easily identify the facial features on ID cards for comparison against the holder. This makes it the ideal solution for drivers' licences, national ID cards and other cards where security is paramount.

The Ultima retransfer printer comes with built-in visual security via the use of up to 10 secure Holokote® watermarks. That means that if you choose to do so, you can distinguish different departments with a separate holographic design. For additional built-in security, Ultima exploits the wavelengths of the dye-film so it can fluoresce under UV lighting.

600

Hi-res, data-secure direct-to-card printing

Security, compliance and peace of mind: built in.

A world-class ID printing solution delivering faster print speeds, stringent security and the finest detail, the Magicard 600 integrates seamlessly with existing infrastructure to deliver secure processing of ID credentials.

Wi-Fi connectivity - as standard via supplied dongle, - IEEE 802.11b/g/n compliant with connection of speeds up to 300Mbps. Supports WPA and WPA2 encrypted connection (access point dependent).

An eye for detail - capable of printing at 600 x 300 dpi*, the Magicard 600 allows you to include even 5 point text - and make it legible.

Superior quality - The Magicard 600 offers a wide colour spectrum so printing is more vibrant and colour-rich. That means a truer representation of the subject - perfect for photographs on ID cards and more accurate depiction of corporate logos and other images.

Plug and play - to get you up and running quickly and easily, the Magicard 600 integrates with existing network infrastructure 'out of the box', minimising set-up time and requiring little technical knowledge.

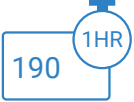

Faster speeds - each full colour, single-sided card, with HoloKote®, can be printed in under 20 seconds giving the Magicard 600 the ability to print up to 190 cards per hour.

Updates and upgrades - The Magicard 600 is easy to keep up-to-date with the latest features and fixes as and when they're available.

Ultra-secure

Data shredding™ - once data has been used for the print job, it is fragmented, rendering it irrecoverable, helping to ensure the Magicard 600 is not a repository for data.

Anti-fraud - the Magicard 600 has the ability to print a customisable HoloKote® watermark on every card. Each device has the built-in ability to receive up to 10 anti-fraud customised HoloKotes® direct to the printer via Magicard's web tool.

Threat benchmarked - we run security scans against the comprehensive vulnerability assessment tool, Nessus Pro, one of the most widely deployed security technologies in the world and push regular updates to the device, ensuring that the printer software and associated system configuration conform to the highest levels of security.

Custom casing options

The Magicard 600 comes as standard in a neutral grey but we have made alternative casing colours available as options to reflect the building blocks of colour printing, YMCK (and white) so you can personalise your printer in line with your brand identity.

Minimum order quantity applies.

Faster, flexible, professional direct-to-card printing

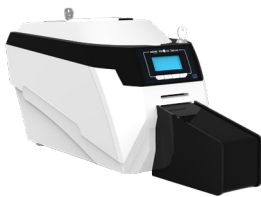

One of our fastest printers, the advanced Rio Pro 360 is a powerful way to create secure ID cards in high volumes. Each full colour, single-sided card with HoloKote®, can be printed in under 20 seconds giving the Rio Pro 360 the ability to print up to 190 cards per hour. It makes use of a wide colour spectrum so printing is vibrant and colour-rich, providing a truer representation of the subject – perfect for photographs on ID cards as well as more accurate depiction of corporate logos and other images.

The Rio Pro 360 benefits from tried and tested Linux compatibility so it integrates with existing network infrastructure 'out of the box', minimising set-up time and requiring little technical knowledge.

VARIANTS

Rio PRO 360™ Secure

Secure your credentials - The Rio Pro 360 Secure features an opaque, lockable input hopper to secure blank cards. A secondary lock prevents the printer from being opened by unauthorised personnel and secures the opaque output stacker cover.

Rio PRO 360™ Xtended

Xtend your card printing capability - With an extra-large hopper and stacker, this adaptation of the Rio Pro 360 prints oversized cards up to 140mm (5.51") long. Ideal for ticketing, accreditation and labelling.

Rio PRO

Simple, efficient and effective - The predecessor to the Rio Pro 360, this card printer offers a practical solution to ID card creation. Print one offs or up to 100 cards in one batch. Upgrade to double-sided printing using an upgrade kit.

Pronto PK

Portable, secure ID card printing

Magicard's portable ID printer, the ProntoPK, delivers ID to individuals at point of greatest need. For dispersed communities, refugees or otherwise displaced people, the ProntoPK represents a lifeline to control of their identity and destiny.

The printer is portable, rugged and secure and with its high capacity battery ProntoPK can deliver ID cards all day in the toughest of environments. It comes in a rugged IP67 Mil-spec carrying case including all components and supplies so users have everything they need

As it is WiFi-enabled, print jobs can be sent wirelessly from the supplied 7" Android tablet using Magicard's own printing app.

Professional product and price labelling

Print food safe, eye-catching and durable labels in-store and on demand.

Feel confident your displays are stocked with fully compliant labels including all mandatory nutrition and allergen information.

PriceCardPro® FLEX

Create up to 100 longer-length label cards at a time. A 140mm price card can be printed in under 10 seconds.

PriceCardPro® DUO

Full colour, credit card-sized double sided batch printing.

PriceCardPro® LITE

Print one hand-fed full colour card at a time.
